IES Interactive Training Launches New Interactive Web-Site

Industry leaders in interactive force options/ firearms training simulators launch new interactive web site to provide updated simulator product information, industry news and research, and information on new training systems and services from IES and partners.

For Immediate Release

Ann Arbor, Michigan
March 2009

IES Interactive Training, an Ann Arbor Michigan based provider of interactive high-definition use-of-force training simulators, firearms diagnostic systems and software, and force options training equipment announced today that they have launched a new interactive website to bring more information about these systems to industry and the public safety market. All visitors to the new IES web site will be able to easily browse, read, review and download information about IES's market-leading interactive training simulators and services, as well as training industry news and events from IES's many partners.

IES has been a leading manufacturer of simulation training systems since 1994, and its well-known MILO Range training platform has become the de facto system of choice for hundreds of law enforcement, public safety, military and international armed forces. Currently on the new IES website, visitors can find information on MILO Range Pro version 4, IES's newest and most innovative training platform to date. Also, visitors can read about IES's newest product, the MILO Range Advanced--a full featured mobile laptop based simulator loaded with many of IES's most requested features and hundreds of HD video scenarios and exercises at a price point any agency can afford. All IES systems come ready-to-train out of the box, and are backed with IES's dedicated professional 24x7 customer and technical support

For more information on IES or our industry-leading training products, please visit our new website at www.ies.usa.com or call 1.800.344.1707.
